"I-285 & SR 400 Improvements.")

The I-285/SR 400 Interchange Reconstruction project proposes operational improvements along I-285 and SR 400 at and leading up to the interchange. The proposed improvements include construction of barrier-separated collector-distributor (CD) lanes along I-285 and SR 400, reconstruction of existing ramps, and construction of new flyover bridges, as well as reconstruction and widening of existing bridges in the interchange area.

Please join us during one of the meeting times to learn more about the project, speak directly with project staff, and provide your input!
