

ELECTRICAL TEMPORARY POWER LETTER

Community Development

4800 Ashford Dunwoody Road | Dunwoody, GA 30338
Phone: (678) 382-6800 | Fax: (770) 396-4828

TO: All Electrical Contractors

Please Issue a temporary approval on the electrical service conductors at:

Street Address: _____ Subdivision/Project: _____

Building Permit Number: _____ Lot & Block/Space/Suite: _____

for a period of _____ days.

This request is made in order to _____

In asking your approval to energize these conductors on a temporary basis, we agree to the following:

1. We _____ assume all responsibility and liability for any use of electricity in this building/structure during this temporary period.
2. It is understood that no occupancy is to be allowed during use of this temporary approval, and that occupancy will result in immediate disconnection of electrical service.
3. We relieve the City of Dunwoody and any consultants of the city of Dunwoody and its inspectors, and utility company from any liability for damage or loss from ordering electricity disconnected from the wiring system.
4. A state licensed electrician will be responsible for the job site.
5. We understand that any violation(s) of the above will be taken into consideration in future applications by us for other temporary approvals.
6. We understand and agree that in ordering the utility company to connect this service that you have also ordered them to disconnect it at the close of business hours on the last date covered by this letter unless this building/structure has received all final (approved) inspections required by law and a certificate of occupancy or completion has been issued.
7. We assume all responsibility for any damage or injury resulting from this connection.

The following information is requested to determine whether or not electrical equipment you are requesting service for meets the requirements of the National Electrical Code (NEC 110-9,110-10) as it pertains to the available short-circuit current.

Available fault current at the line side of the service disconnect: _____

Main panel overcurrent device:

Type _____ Size _____ Interrupting Rating _____
